Query compound

TNG908

PRMT5 inhibitor

Compound developed from an HTS hit that binds the PRMT5-MTA complex. (Cottrell et al., 2024)

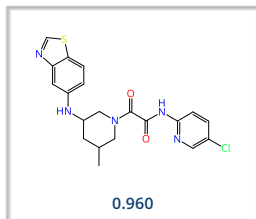

All displayed molecules are the best ranking results retrieved with **infiniSee** in the respective modes. The associated similarity score is provided for each entry in the box.

Scaffold Hopper (FTrees): Fuzzy pharmacophore.

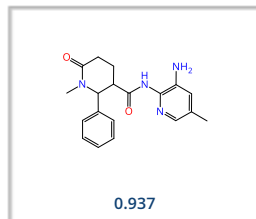

Analog Hunter (SpaceLight): Tanimoto similarity.

Motif Matcher (SpaceMACS): Maximum common substructure.
